👤 About

I am a passionate and creative full-stack software engineer based in Colombia. I consider myself a proactive worker and learner, being able to work with a team, under the terms of respect and support, and helping build diverse, inclusive and safe and sound workplaces. I am always eager for challenges where I can gain new skills or improve the existent ones.

📁 Experience

Software Technologist @ Matter Supply Co.

Remote – Sep 2020 ~ Present – Full-time

I have worked with multiple clients developing features for their online stores, using NextJS and TypeScript, with integrations to Contentful and Shopify. Additionally worked updating an existent Android app to a more modern codebase using a stack that included Kotlin, Coroutines, ViewModels and DataBinding.

Associate Professor @ Universidad de Antioquia

Remote – Sep 2021 ~ Oct 2021 – Seasonal

Worked as an associate professor for the government program "Misión TIC 2022" teaching topics such as: Git, JavaScript, NodeJS, React, MongoDB y Express.

Chief Technology Officer @ Synaptikö S.L

Remote – Feb 2021 ~ Jun 2021 – Freelance

I led a team of 3 people working on developing a platform for mental health care. I was in charge of taking decisions on architecture planning and design and features development.

Technical Development Lead @ BPSmart S.A.S

Remote – Jan 2020 ~ Aug 2020 – Full-time

I led a team of 6 junior developers and I worked on architecture planning, tasks assignment and helping them learn and gain new skills while they develop and build the company software products. Additionally, I partially worked on the development process of some of those products too as a full-stack developer.

Full Stack Developer @ Servex S.A.C.

Remote – Sep 2018 ~ Dec 2019 – Full-time

I worked on multiple frontend and backend apps using the MERN stack and Python, building bots apps, implementing artificial intelligence processes and sales and payments management tools, including BPOs.

Mobile Developer @ Vezio Inc.

Remote – Oct 2017 ~ Jan 2019 – Part-time

As the first Android developer in the team, I had the opportunity to start the Android app development and take it from the idea to the final product, reaching most of features for the initial version and making it almost as functional as the companion desktop and web apps.

I also had the responsibility of creating the initial iOS app for the company's product and making it as useful and featured as the previous developed Android app, and then continue working on both to make them grow as needed.

Full Stack Developer

Remote – Jan 2015 ~ Oct 2017 – Freelance

I have created a few Android apps as personal projects and also was contacted to do a couple design related works, mostly focused on Material Design iconography.
